

Checkpoint-RelAlg Visual Standard

Reusable OmniGraffle grammar · English Times New Roman · vector icons · LaTeX equations

STANDARD V1

TYPOGRAPHY AND GRID

Canvas title	38 px · Bold
Section heading	20 px · Bold
Node title	16 px · Bold
Body	14 px · Regular
Edge label	13 px · Italic
Chip / footnote	13 / 13 px

Font: Times New Roman

Canvas: 1920 × 1080 · 48 px safe margin

8 px base grid · 24 px major grid · 24 px node gap

SEMANTIC COLOR TOKENS

 Provider	#6658D3	 Protocol	#246BCE
 State / Artifact	#138A7E	 Execution	#D97706
 Checkpoint	#8B5CF6	 Success	#26845B
 Error	#C2414B	 Hidden / Audit	#475467
 Warning	#B7791F	 Ink	#172033

VECTOR ICON GRAMMAR

 Task / record	 Model / provider
 Validator / guard	 Source database
 Relation artifact	 Observation
 Snapshot / phase	 Audit / replay
 No-leak / disabled	 Structured error

CONNECTOR GRAMMAR

Successful semantic transition	
Data / relation flow	
Execution request	
Structured error / rollback	
Checkpoint / restore control	
Optional / retry / diagnostic	
Forbidden / no-leak direction	

SHAPE GRAMMAR

 **Process**
rounded rectangle

 **Relation artifact**
table card

 **Checkpoint**
snapshot + flag

 **Hidden evaluator**
dashed secure zone

Use native vectors or SVG only. Never rasterize source icons.

LATEX EQUATION POLICY

- 1 · Store canonical source in checkpoint_relalg_formulas.tex.
- 2 · Render with LaTeX and Times-compatible math fonts.
- 3 · Convert fonts to vector paths with dvisvgm.
- 4 · Place on the EQUATIONS layer; keep data-latex metadata.
- 5 · Never approximate formulas with Unicode text boxes.

$$\widehat{R} = \text{Artifact}(a_T), \quad \text{Acc}_{\text{official}} = \mathbf{1} \left[\text{Set}(\widehat{R}) = \text{Set}(R^*) \right]$$

OMNIGRAFFLE LAYER AND CONSTRUCTION CONTRACT

Layer order: BACKGROUND → GROUPS → CONNECTORS → NODES → ICONS → LABELS → EQUATIONS → CALLOUTS

Build order: claim → lanes/groups → nodes → connectors → labels → vector icons → LaTeX equations → authority review

Stable names: STATE.EnvironmentState · TOOL.aggregate · BOUNDARY.no_leak · FORMULA.F10

Editable .graffle + LaTeX source are authoritative. SVG/PDF are vector exports; PNG is preview only.

RELEASE CHECKLIST

- ✓ English Times New Roman throughout
- ✓ Exact executable tool names and current protocol status
- ✓ Authority, working-memory, and no-leak boundaries explicit
- ✓ Failure path preserves logical state and creates no artifact
- ✓ LaTeX source + vector rendering for every equation
- ✓ OmniGraffle, SVG, PDF, PNG, and manifest verified
